My Vision:

Your vision statement promotes growth. A strong vision helps you focus on what matters the most in order to become, behave, or exist how you describe your future self.

- What are your hopes and dreams on a broad scale?
- What does your ideal life feel like?
- If you truly implement your core values and live by your mission, what is the result?

My Mission Statement:

Your mission statement is how you operate. An effective mission statement reminds you what your values are and how you implement them in the day to day.

- What do you do?
- How do you do it?
- What defines your day to day operations?
